CAREER SUMMARY :

AI-focused Python Developer with 2+ years of experience building **Agentic AI** systems, **Generative AI** pipelines, and production-grade automation. Proven track record delivering measurable results — including an 18% accuracy improvement in a self-optimizing AI classification system and a 20% faster data pipeline. Skilled in Python development, LLM-based application development, and technical documentation.

WORK EXPERIENCE :

Micron (Applied AI) | **AI/ML Research Intern** | 11th June, 2026 – 10th July, 2026

- Built **SkillOpt**, a self-optimizing AI skill for automated NVMe firmware log error classification, replacing slow manual log review with an AI-driven pipeline.
- Designed an adversarial optimizer-target model loop with a validation gate that iteratively refined the skill, **improving classification accuracy by 18%** on unseen validation logs.
- Built and **deployed a plugin** packaging SkillOpt for testing, conducted **cost-per-run and accuracy** analysis across multiple model configurations, and documented the full system architecture and trade-offs for team handoff.

TCS (Jaguar Landrover) | **Python Developer** | 4th February, 2024 – 30th June, 2025

- Work on project **Kubricks** as Web Python Developer
- Work as Python Developer to write Cloud Function on GCP and Trigger to initiate changes to Dataset.
- Make Documentation with Confluence and maintain Agile Workflow on Jira.

TCS (Jaguar Landrover) | **Python MongoDB Developer** | 21st August, 2023 – 30th January, 2024

- Work on project **Product 360 (Research Project)**, build to increase the efficiency of data flow .
- Work on the middleware of ODS and ODL where we need to add MongoDB Trigger in order to ensure the required changes to be fulfilled.
- We are making the Trigger Work faster by using Document inside Document Technique which finally **increase the Data flow by 20%** .

DTree Labs LLP | **Full Stack Developer** | 1st Jan 2023 – 30th May 2023

- Working on Project **RCC UPSC Portal** with Technology (ReactJs , NextJs and Mantine UI)
- Writing Mantine UI components, with backend REST services

RELEVANT PROJECTS :

Height Estate Price Prediction | (AI Algorithm) | Dec 2025 – Jan 2026 |

- This WebApp is project made to predict House Price based on feature and Correlation.
- It is build from scratch from Data Processing to Model Training , it is also has beautiful UI made with NextJs

Fitness Coach | WebApp (Agentic AI from core python) | Feb 2026 – March 2026 |

- Developed a hybrid agent-based Personal AI Fitness Coach web application as a hackathon project, integrating planning, monitoring, reasoning, and motivational agents.
- Leveraged MongoDB for persistent user data and LLMs for adaptive plan generation and natural language explanations.
- Designed daily goal-oriented loops that adapt fitness and habit plans based on user feedback and trends. Demonstrated autonomous decision-making under constraints with a clean web UI using FastAPI and React.

Tractor Invoice Predictor | Gen AI Developer | April 2026 – May 2026 |

- We aimed to automatically understand tractor invoices and predict the tractor cost by extracting structured information from unstructured document images.
- understanding of Document AI, computer vision, OCR pipelines, and real-world ML deployment challenges.

EDUCATION :

- 2025 – Present | **MTech in Computer Science and Engineering** | IIT Hyderabad | (CGPA : 8.15)
- 2019 – 2023 | **Btech in Computer Science and Engineering** | (CGPA : 9.0)

SKILLS :

- **AI/ML & Generative AI** : Agentic AI Systems, LLM-based Application Development , Gen AI.
- **Frontend & Data** : React.js, Next.js, Mantine UI, Bootstrap, Data Analysis, Data Visualization
- **Tools and Backend** : Git, Jira, Confluence, Agile Workflow, Technical Documentation , FastAPI , GCP
- **Good at Communication** and **Collaboration** with Team.
